

# Continuous Antibody Purification for Higher Throughput and Lower Costs

Free of charge

Practical strategies for capture and polishing workflows

**Combining Resin Expertise with Continuous Chromatography Technology**  
**Experts from YMC Europe & YMC ChromaCon**

Date: April 16, 2026

Time: 3:00 PM – 4:00 PM (CET)

Live Online Webinar

## Why attend?

Antibody purification processes still hold untapped potential. The theoretical foundations are well known, and translating these principles into efficient, sustainable, and scalable processes remains a dynamic challenge. Join our webinar on April 16 to learn how continuous chromatography and smart resin selection can boost productivity, reduce resource consumption, and enhance sustainability.

## What you will learn

- Why it pays off to optimise established platform processes and resins
- Practical strategies for continuous capture & polishing
- Key considerations for implementation and scale-up
- Case insights from mAb workflows

## Who should attend?

Downstream Process Scientists

DSP & MSAT Teams

Bioprocess Engineers
